

WATER DISTRICT 19
Phase 1 – Ridge Road Water Main Replacement

February 16, 2011

In March of 2010, the Board of Commissioners of Water District 19 authorized an engineering design services contract to replace the 4 inch steel water main located on Ridge Road and SW 184th St. from Beall Road to just north of Klahanie Road. Phase 1 of the Residential Water Main Replacement Project will be the first 750 feet east from Beall Road to 8812 SW 184th St.

The total engineering cost for all phases of the Ridge Road Main Replacement Project will be \$59,970. Construction cost for Phase I is approved at \$76,881. Construction activities include replacing the water main, reconnecting service connections to the homes at the water meters and installing fire hydrants. Construction for Phase I is anticipated to start in March 2011 and last for two weeks.

During construction, every effort will be made to minimize the impact to the local residents. However, as with any water main reconstruction project, there will be some inconvenience and we appreciate your patience during this time.

Once construction begins, the District will post updates and information concerning the progress of this project on the District's website at <http://water19.com>.

If you have questions, you may contact the District office by telephone at 206-463-9007 or email at water19@water19.com.
